CREATING REPOSITORY IN IBM CLOUD:

The screenshot shows a dark-themed dialog box titled "Create repository" with a close button (X) in the top right corner. It contains two numbered steps for creating a repository:

1. Tag an image to point to this registry. Choose a local image, target namespace, and target repository.

```
docker tag <local_image> icr.io/<my_namespace>/<my_repo>
```
2. Push the tagged image.

```
docker push icr.io/<my_namespace>/<my_repo>
```

Each code block is followed by a copy icon.

UPLOAD IMAGE TO IBM CONTAINER REGISTRY:
