Question 1:

Pull an Image from docker hub and run it in docker playground.

The screenshot shows a web browser window displaying the Docker Hub page for the repository `uifd/ui-for-docker`. The page includes the repository name, a star icon, and a pull count of 10M+. Below this, there is a description: "A web interface for Docker, formerly known as DockerUI. Deprecated, use Portainer for new features." There are tabs for "Overview" and "Tags". The "Overview" tab is active, showing a message that the repository is deprecated and development continues at `portainer/portainer`. A "chat on github" button is also visible. On the right, there is a "Docker Pull Command" section with a code block containing `docker pull uifd/ui-for-d...`. The browser's address bar shows `hub.docker.com/r/uifd/ui-for-docker`. The Windows taskbar at the bottom shows various icons, including Docker Desktop.

The screenshot shows the Docker Playground interface. On the left, there is a sidebar with a clock showing 03:42:30, a "CLOSE SESSION" button, and a list of instances. One instance is listed with IP `192.168.0.13` and name `node1`. The main area displays the details for the selected instance, including its IP address, memory, CPU, and an SSH command: `ssh ip172-18-0-4-cd9an2u3tccg00fgf6k0@direct.labs.play-w`. Below this, there are "DELETE" and "EDITOR" buttons. The bottom section shows a terminal window with the following commands and output:

```
# This is a sandbox environment. Using personal credentials is HIGHLY discouraged. Any consequences of doing so are completely the user's responsibilities.
# The FWD team.

Question 3:

Create an IBM container registry and deploy helloworld app or Job portal app.

```
PS C:\Users\HP> docker tag hello-world icr.io/0034ns/helloworld
PS C:\Users\HP> docker push icr.io/0034ns/helloworld
Using default tag: latest
The push refers to repository [icr.io/0034ns/helloworld]

```

Question 4:

Create a Kubernetes cluster in IBM cloud and deploy helloworld image or job portal image and also expose the same app to run in node port.
